

Player Injury Management:

- ACE FC will at all times endeavour to provide a safe environment for our players, parents, official and spectators.
- If a member witnesses an event or situation that may place a member in danger of injury then they should report it immediately on the ACE FC Grievance Form.
- Whilst ACE FC may have a First Aid trained volunteer who can assist in minor injuries, **parents are ultimately responsible for decisions made and treatment should a player get injured during games or training.**
- There is a First Aid kit and Ice available in the canteen side door for minor injuries during training and games.
- Should an injury be more serious than the volunteer is comfortable dealing with, then an Ambulance should be called.
- This decision however should be made by the parent.
- To call Ambulance, **Emergency** dial: 000 or 112 from your mobile. **Non Emergency** Dial 13 12 33. Address to attend is Albany Creek Football Club, Southpine Sporting Complex, Cribb Rd, Brendale 4500. Instruct them to turn left at the roundabout in the complex and we are the last building on the right. The ambulance gate for them to get on the top fields is in the main car park on the right hand side. The key for this gate is on the Ground Officials keys which is located in the canteen. For them to get onto the bottom fields instruct them to continue around Cribb Rd to the bottom carpark.
- Record injuries that require treatment on your ACE FC match sheet so that we can refer back to them if required for Insurance .
- As part as your Football Federation Australia membership every active player is covered by Insurance. Claims are not handled by the Club. For further details please visit <http://www.gowgatessport.com.au/football/>
